ProQuest Hospital Collection

The ProQuest Hospital Collection supports the broad information needs of health and social care professionals by combining five health and medical databases into a single unified resource. ProQuest Hospital Collection provides scholarly journals in full-text across hundreds of healthcare related disciplines including; medical, nursing, allied health, psychology, healthcare administration, family management, and other complementary areas of research. Details on each database are provided below.

ProQuest Health & Medical Complete
• This database offers reliable, comprehensive journal coverage of clinical and biomedical topics, consumer health, health administration and more.
• At present more than 2,700 full-text scholarly and professional titles are included in this resource.
• Grey literature is also covered in the form of dissertations and theses, conference proceedings, and reports, also in full-text.

ProQuest Nursing & Allied Health Source
• This database covers a wide range of nursing subjects including, allied health, geriatrics, mental health, informatics, public health, paediatrics, pharmacology, and many others.
• At present more than 1,200 full-text scholarly and professional titles are included in this resource.
• Grey literature is also covered in the form of dissertations and theses, conference proceedings, and reports, also in full-text.
• Training videos on many nursing related procedures and topics from MedCom, Inc. (an American provider) are also included in ProQuest Nursing & Allied Health Source. These videos may be viewed within the ProQuest platform or downloaded for future viewing.

ProQuest Psychology Journals
• This database provides abstracts and indexing for more than 1,100 titles, with over 750 titles available in full text. Many titles are indexed in PsycINFO. Coverage ranges from behavioural, clinical, cognitive, developmental, experimental, industrial and social psychology, along with personality, psychobiology and psychometrics.

ProQuest Family Health
• This database includes journals and magazines from a range of health related disciplines such as sports injuries, women’s health, nutrition, midwifery, eye care, and dentistry. Consumer and news magazines are also provided, making this a useful resource for general health information.

ProQuest Health Management
• This databases covers information resources relevant to health administration and health policy. Over 900 full text scholarly and professional titles are available to researchers, covering
healthcare facilities administration, business management, insurance, human resources, and other related topics. Over 5,000 dissertations are also discoverable.
