How to change the ProQuest Login Link within MyAthens

OpenAthens MD – Changing the Link from the Resources Menu

Within the Resources Menu select the Resource Catalogue. This is where you will find a list of all the potential resources that could be accessed by OpenAthens if you held active subscriptions to them as well as those resources that have already been allocated by your institution.

This is a sample view of the Resource Catalogue:

Resources are listed as cards, and from here you should be able to find a card for the ProQuest Platform. Clicking on that card will display more detail about this resource, and allow you to modify the login URL that your end users will see within their OpenAthens page.

This is a sample screenshot of the Modify Resource screen:
How to change the ProQuest Login Link within MyAthens

When you see this information for ProQuest, please, replace the URL that appears in the Access URL field with the following URL and click on ‘Save changes’:

http://search.proquest.com/shibboleth?accountid=146454

OpenAthens MD – Cascading the Changes to all your Users

Once you have saved the new link you will need to cascade the change down to all your sub-accounts. You do that from the Resource Catalogue by locating the ProQuest Platform card, selecting the checkbox on the top right and selecting ‘Cascade’ from within the ‘Actions’ drop-down menu:

This will add the ProQuest Platform resource to any permission sets that are marked as default that belong to any of your sub-administrators, any of their sub-administrators and so on; you may choose whether to include your own default permission sets in this allocation or not.
